

Intec Referral Program - 7.5/5

OBJECTIVES:

1. Increase Referring Partner's customer – ex: contractor -- loyalty.
2. Provide Referring Partner with a profit stream -- in terms of a referral \$ --with no associated costs.
3. Increase Intec system awareness & sales in the marketplace.

PROGRAM OVERVIEW:

1. Intec's referral program provides Referring Partner the opportunity to offer Intec blowing systems to their target customers at a 5% discount v. Intec MSRP (note: Intec has put various actions in place to support list -- i.e. MSRP -- pricing of our equipment in the marketplace. Our systems typically sell at list, slightly above, and at times slightly below with a discount of up to 5%). The 5% provides a competitive price to Referring Partner's customers, thus building increased loyalty to Referring Partner due to this -- and future -- purchases of Intec systems.
2. Referring Partner receives a 7.5% referral fee for each system sold thru this program. Considering equipment pricing, referral fee amounts to an average referral fee in the \$500 range. Referring Partner's activities are to simply complete the referral form (see appendices for example "Intec Blowing Machine Referral Forms". Note form to be customized for Referring Partner to (i) promote their company, and (ii) make tie for Intec to Referring Partner) and send to Intec's Customer Service.
3. Intec's Customer Service will make contact with customer, ensure system(s) desired meets their objectives, arrange for delivery and payment, then ship system(s) to Referring Partner's customer.

Intec payment timing of referral fee:

The referral fee is paid quarterly once Intec has collected payment from customer. Considering Intec standard 30 day terms, referral fees for sales taking place in...

- Q1 (Jan 1 thru March 31) are to be paid the second week of May,
- Q2 (April 1 thru June 30) are to be paid the second week of August,
- Q3 (July 1 thru September 30) are to be paid the second week of November, and
- Q4 (October 1 thru December 31) are to be paid the second week of February

...for sales Referring Partner has provided Intec, Intec has closed, and customer payment has been collected.

PROCESS / FAQs:

1. How to set up Intec referral program with a target customer?

Provide request to Ray including (i) rationale as to who you recommend to become a Referring Partner, (ii) if referral form is to include all Intec systems, cellulose only, or fiberglass only, and (iii) Referring Partner's logo. Ray will review request considering your rationale and potential competitive issues prior to approving. With approval, Ray will provide custom pdf form to be shared with customer.

You will need to complete Referral Program letter and send to Ray for signature. This letter can then be sent to Referring Partner

2. Future Purchases – form needs to be filled out.

The Referring Partner needs to complete referral form and send to Intec Customer Service for all orders – be it first time or repeat. If form is not completed, no discount is provided to customer, and no referral fee is sent to Referring Partner. Form needs to be completed for a repeat customer.

3. What tools can Intec provide Referring Partner to assist with awareness creation?

Depends on what customer desires, yet typically:

- Intec Family Guide
- Specific product brochures as customer sees beneficial
- Desktop display dependent on Referring Partner's set-up.
- Banner dependent on Referring Partner's set-up.

4. Contract Duration? 12 months.

We will offer the referral program with a 12 month duration. We will work with Referral Partner throughout year to determine where we may further assist in their targeted success.

5. What is needed from Referring Partner in order for Intec to provide payment?

W9 (referenced when processing referral fee) and signed Referral Program Contract.
