

Introducing CladStone™ Water and Fire Block in two new densities.

Announcing JM's CladStone™ 80 and CladStone™ 110 High Density Water and Fire Block Mineral Wool

Johns Manville has just expanded the JM CladStone™ Water and Fire Block Mineral Wool Insulation line to include, CladStone™ 80 and CladStone™ 110. With this release, JM now offers a complete line of product densities on our exterior commercial mineral wool insulation, ranging from 4.5 pcf to 11.0 pcf.

- Ideal for use in exterior cavity wall, rainscreen, and continuous insulation applications
- Non-combustible for fire-resistant applications
- Water-resistance provides effective drainage from an exterior cavity wall assembly
- The greater density of CladStone™ 80 and 110 can improve handleability during installation

Please see the links below or contact your local JM sales manager for more information.
