

JM CladStone™ 80 Water & Fire Block Insulation

WATER REPELLENT AND FLAME RESISTANT INSULATION

COMPANY

Johns Manville, a Berkshire Hathaway company, was founded in 1858. Our ownership by Berkshire Hathaway, one of the most admired companies in the world and one of the most financially secure, allows JM to invest for the future. This enables JM to continue delivering the broadest range of insulation products in the industry and offering innovative solutions that meet your needs.

DESCRIPTION

JM CladStone™ 80 Insulation is made of inorganic fibers derived from basalt, a volcanic rock. Advanced manufacturing technology ensures consistent product quality, with high-fiber density and low shot content for excellent performance. JM CladStone™ 80 is inorganic, noncombustible, moisture repellent, non-deteriorating, and will not mildew or support corrosion.

USE

JM CladStone™ 80 mineral wool is specifically manufactured for superior performance in continuous insulation commercial applications where rigidity and durability are critical. It is non-combustible and has a density of 8.0 pcf. JM Cladstone™ 80 it is most often used in applications where cladding and cladding attachments penetrate through the continuous insulation. In addition to the standard thermal and acoustical performance you would expect from Johns Manville products, JM CladStone™ 80 has water repellent properties that allow for the effective drainage of water from the exterior of the building.

INSTALLATION

JM CladStone™ 80 Insulation can be installed with a variety of exterior cladding systems and can be mechanically fastened using impaling pins, screws & washers, insulation fasteners, plastic cap nails, or other proprietary fasteners. Please see the Installation Guide for more information.

PACKAGING

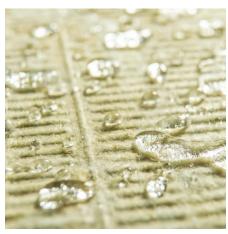

JM CladStone™ 80 is packaged in poly shrink wrap.

DESIGN CONSIDERATIONS

JM CladStone™ 80 Insulation should not be left directly exposed to the elements; it should be covered with an appropriate finish. JM CladStone™ 80 is available in one density, 8.0 pcf.

LIMITATIONS OF USE

Check applicable building codes.

Actual color of product may be lighter than image. Product image typical of material produced in the USA.

PERFORMANCE ADVANTAGES

Fire Safety: JM CladStone™ 80 has a melting point in excess of 2000° F. See Applicable Standards for details.

Noncombustible: See Applicable Standards for details.

Durable & Inorganic: JM CladStone™ 80 does not support growth of fungi, nor does it sustain vermin.

Water Repellent: JM CladStone™ 80 repels water to ensure proper wall cavity drainage when applied as part of a proper exterior wall cavity system (See Installation Guide)

JM CladStone™ 80 Water & Fire Block Insulation

WATER REPELLENT AND FLAME RESISTANT INSULATION

APPLICABLE STANDARDS & BUILDING APPLICATION

Test Method	Values	
ASTM C 612	Type IVB	
ASTM C 518	R Per Inch 4.2	
ASTM C 1104	Moisture Sorption 0.11%	
ASTM C 1338 Fungi Resistance – Passed		
ASTM C 165	639 psf (30.6 kPa) @ 10% compression 1479 psf (70.8kPa) @ 25% compression	
ASTM E136	Non-combustible	
ISO 1182	Non-combustible	
CAN-ULC S114	Non-combustible	
ASTM C 1617	TM C 1617 Pass	
ASTM E 84	STM E 84 Flame Spread 0, Smoke Developed 0	
ASTM C 365	Linear Shrinkage <2% 1200°F (650°C)	
ASTM C 1335	Shot Content <25%	
NFPA 285	Commercial Fire Resistance — Assembly Passed	

STANDARD SIZES

Thickness		Widths	Length	R-Value
Density	in (mm)	in (mm)	in (mm)	per Inch
8.0 pcf	1"- 3" (25 - 76)	16 (406) & 24 (610)	48 (1219)	4.2

^{*}Special sizes available on special order. Minimum order quantities will apply.

Technical specifications as shown in this literature are intended to be used as general guidelines only. Please refer to the Safety Data Sheet and product label prior to using this product. The physical and chemical properties of Cladstone™ 80 listed herein represent typical, average values obtained in accordance with accepted test methods and are subject to normal manufacturing variations. They are supplied as a technical service and are subject to change without notice. Any references to numerical flame spread or smoke developed ratings are not intended to reflect hazards presented by these or any other materials under actual fire conditions. Check with the sales office nearest you for current information. All Johns Manville products are sold subject to Johns Manville's standard Terms and Conditions, which includes a Limited Warranty and Limitation of Remedy. For a copy of the Johns Manville standard Terms and Conditions or for information on other Johns Manville insulation and systems, visit www.jm.com/terms-conditions or call 800-654-3103.
