## Owens Corning Batts and Blanket Fiber Glass Insulation

Owens Corning will accept no responsibility when the product is not installed in accordance with the product label. Stated R-value is provided by installing the required number of bags at a thickness not less than the labeled minimum thickness. Installation of the required number of bags may yield more than the specified minimum thickness. Failure by the installer to provide both the required bags and at least the minimum thickness will result in lower insulation R-value.

Blanket and batt fiber glass insulation, when installed according to the manufacturers recommendations, will provide the stated R-Value.
