QUIK-SHIELD 108YM YIELD MONSTER

Ultra-Low Density Open-Cell Spray Foam Insulation

ARE YOU READY FOR THE MONSTER?

QUIK-SHIELD® 108YM, the Yield Monster, is an open-cell spray foam with an ultra-low density of 0.36-0.4lb/ft³. It is ideal for high-performance and air barrier insulation applications in residential (IRC) and commercial (IBC) construction. Customers who follow the processing parameters for QUIK-SHIELD® 108YM achieve an average of 23,000 - 25,000 board feet per set.

Yield Monster provides installers with the lowest cost installed with features that increase job site efficiencies such as ultra-low density, superior adhesion and cohesion, and long-range application. QUIK-SHIELD® 108YM is also virtually odor-free and does not need mechanical ventilation in new residential construction.

“

I use QUIK-SHIELD® 108YM over the competitor's foam not only for the outstanding yields but also because it is easy to dial-in and very easy to spray. It definitely has helped us as a company become more productive with less downtime from being able to spray it at high lifts in one pass.
